Assignment 4 Post-Mortem

Question 1 [8 marks]

- Many solutions did not clean up empty clusters after deleting the last element. This would cause space to be bigger than claimed.

Question 2 [2+5+4=12 marks]

- This question was done well.

Question 3 [2+4(+5)+2 = 8(+5) marks]

- This question was done well.
- Rounding errors were common in part (c), where getting the rounding right is important.

Question 4 [2+5+5+5=17 marks]

- There were no common errors.

Question 5 [5+5+2=12 marks]

- There were no common errors.
- There are several ways to solve parts (a), (b). Even if you got full marks, you are still encouraged to look at the intended solutions.
