

Post-Mortem

CS135 Winter 2024, Assignment 03

Question 2abd (waterloo2-poker.rkt)

- **ordinality**
 - Some students wrote a separate conditional statement for each Card number, instead of making use of the **number?** or **integer?** function to greatly reduce repetitive code.
- **strength**
 - Many students either did not make use of helper functions to simplify **strength**, and/or did not define constants for each of the different strengths.
- **winner**
 - Some students did not make use of their function from Q2c to greatly simplify this question.

Question 3bc (collide.rkt)

- Some students did not use the provided data definitions for **Point** and **Sphere** in their contracts.
- Many students did not use **distance-between-points** as a helper function for both questions.
