

# CS449/649: Human-Computer Interaction

Spring 2017

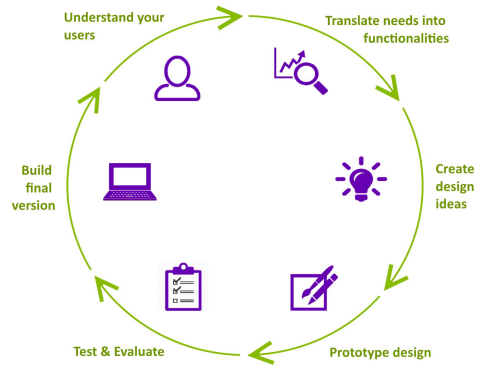

Lecture XVIII

---

Anastasia Kuzminykh

## User Centered Design Process

May 1 - June 14

## History of user centered design in HCI

June 19, June 21

## Academic HCI

June 26, June 28

## Special topics in HCI

July 5, July 10

## Course Review

July 12, July 17

## Presentation 2

July 19

## Last class

July 24

Botanicus Interacticus: Interactive Plant Technology

## Academic HCI

**Ubiquitous Computing -**  
Paradigm in which computing is made to appear anytime and everywhere, through distributed networked processing devices

Term coined by Mark Weiser in late 1980s  
Weiser, Mark. "The computer for the 21st century."  
*Scientific american* 265.3 (1991): 94-104.

The most profound technologies are those that disappear into the background and become indistinguishable from the everyday environment

T. Parshakova et al. [“Furniture that Learns to Move Itself”](#), CHI’17

A. Chua et al. ["Shared Bicycling Over Distance"](#), CHI'17

## Academic HCI

### Computer-Supported Cooperative Work (CSCW) -

area concerned with understanding of the way people work in groups with the enabling technologies of computer networking, and associated hardware, software, services and techniques (Paul Wilson, 1991)

Term coined by Irene Greif and Paul Cashman in 1984

Irene Greif, Computer-Supported Cooperative Work: A Book of Readings. (1988)

**Groupware** - software designed to support collaborative activities and their coordination. Term coined by Trudy and Peter Johnson-Lenz, 1978-1981

## Academic HCI

Johansen, R. Groupware: Computer Support for Business Teams, 1988

## Academic HCI

|                     | Real time   | Asynchronous  |
|---------------------|---|---|
| Communication       | <ul style="list-style-type: none"><li>• Telephone</li><li>• Video conferencing</li><li>• Instant messaging</li><li>• Texting</li></ul>              | <ul style="list-style-type: none"><li>• Email</li><li>• Voice mail</li><li>• Blogs</li><li>• Social <a href="#">networking</a> sites</li></ul>        |
| Information sharing | <ul style="list-style-type: none"><li>• Whiteboards</li><li>• Application sharing</li><li>• Meeting facilitation</li><li>• Virtual worlds</li></ul> | <ul style="list-style-type: none"><li>• Document repositories</li><li>• Wikis</li><li>• Web sites</li><li>• Team workspaces</li></ul>                 |

Analyzing disasters on social media: [Kate Starbird](#) at the GeekWire Summit

## Academic HCI

### HCI for Development (HCI4D) -

area concerned with understanding the use and appropriate design of information and communication technologies (ICTs) in the context of developing regions

The first workshop on user-centered design and international development at CHI 2007 - Dearden, Andy, et al. "User centered design and international development." *Extended Abstracts on Human Factors in Computing Systems*. ACM, 2007.

Ho, Melissa R., et al. "Human-computer interaction for development: The past, present, and future." *Information Technologies & International Development* 5.4 (2009)

Kumar, Neha, et al. "Development consortium: HCI across borders." *Extended Abstracts on Human Factors in Computing Systems*. ACM, 2016.

CHI 2017 [SIGCHI Social Impact Award: Indrani Medhi Thies](#) - Designing for Low-Literate Users

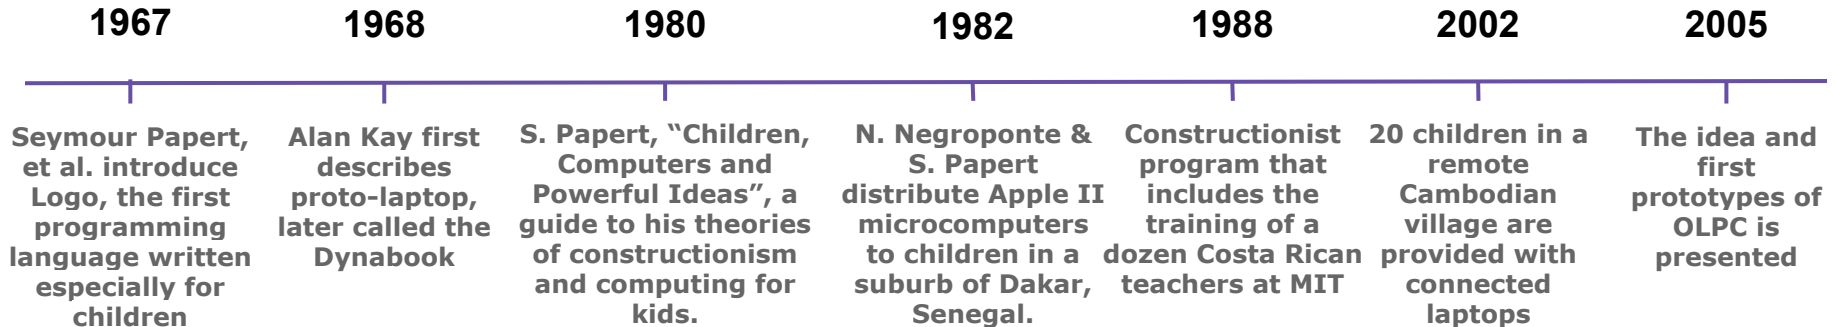

## Academic HCI

### One Laptop Per Child (OLPC) project -

non-profit initiative to enable children in low-income countries to have access to content, media and computer-programming environments.

Nicholas Negroponte, Seymour Papert, Alan Kay and colleagues

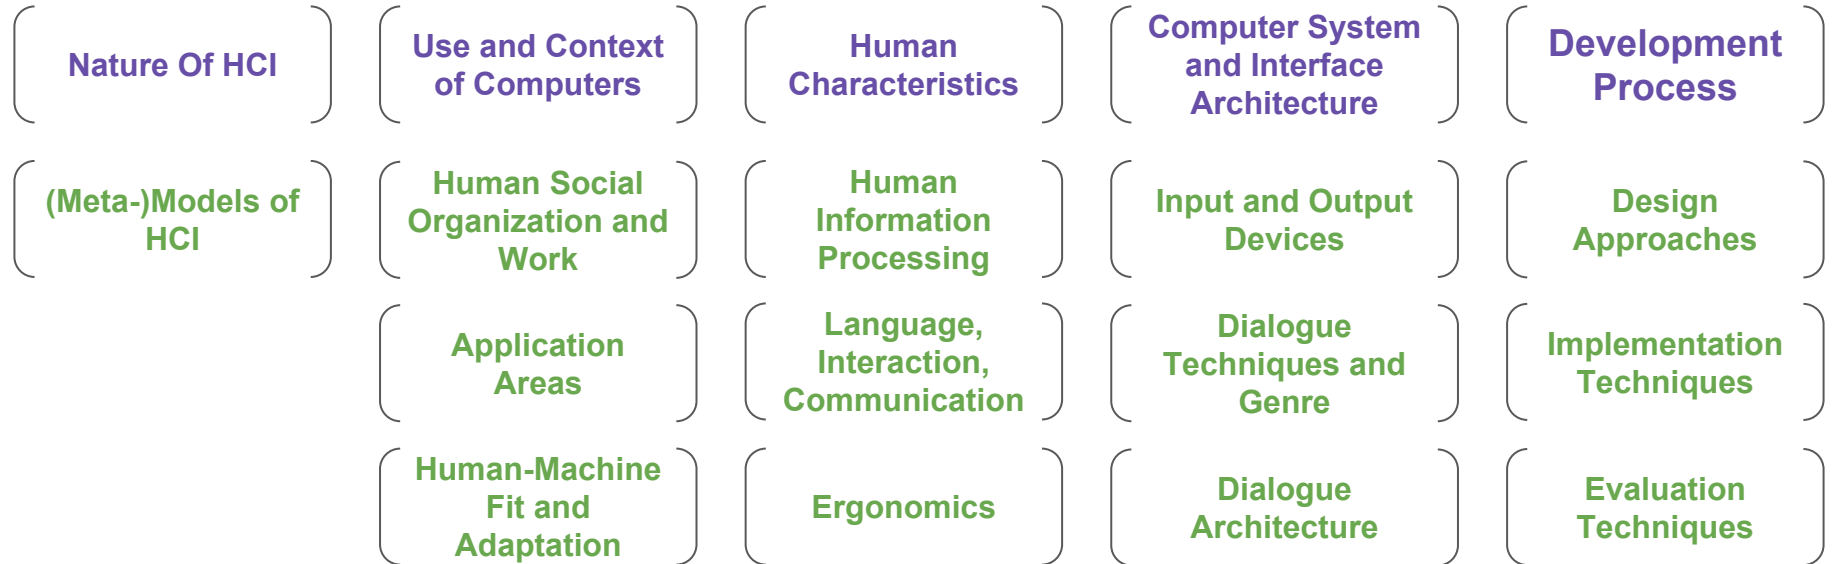

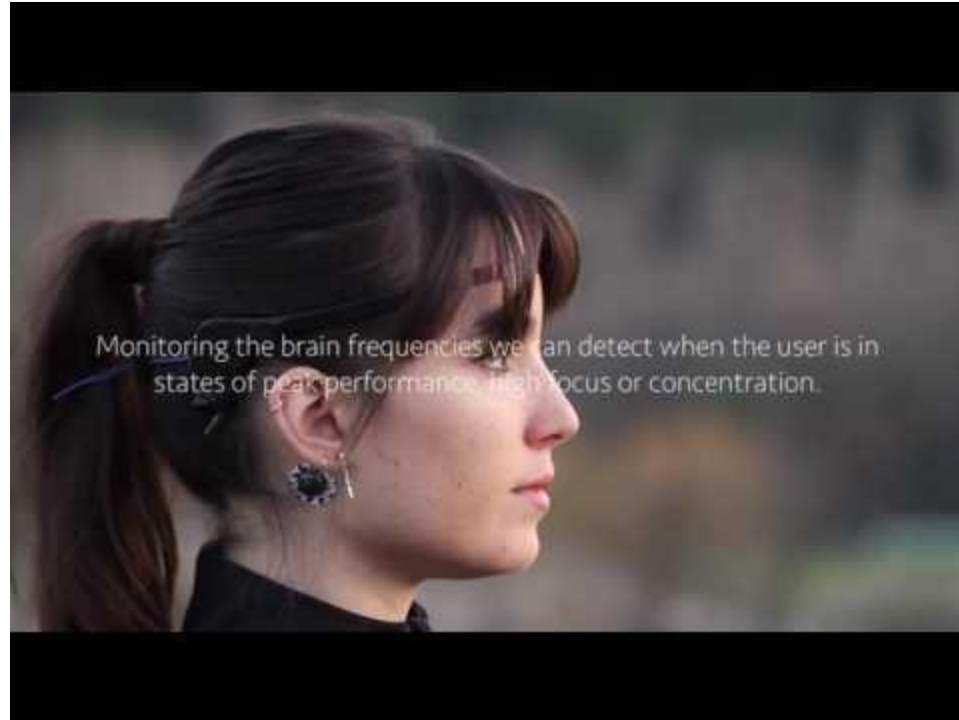

## Academic HCI

### Content of HCI field

J. Amores et al. "Essence: Olfactory Interfaces for Unconscious Influence of Mood and Cognitive Performance", CHI'17

## Academic HCI

### Content of HCI field

|                      |                                    |                                      |  |                           |
|----------------------|------------------------------------|--------------------------------------|--|---------------------------|
| Nature Of HCI        | Use and Context of Computers       | Human Characteristics                | Computer System and Interface Architecture | Development Process       |

# CHI 2017

DENVER, CO, USA | MAY 6-11

## Week 9 take-away

### Concepts:

- Definition of HCI
- HCI fields
- Input and Interaction Techniques
- Ubiquitous computing
- Computer-Supported Cooperative Work and Groupware
- Human-Computer Interaction for Development
- One Laptop Per Child project

### Names:

- Mark Weiser
- Irene Greif
- Trudy and Peter Johnson-Lenz
- Indrani Medhi Thies
- Nicholas Negroponte and Seymour Papert
