Robin Cohen

## About this document

This document is primarily meant to demonstrate the formatting you are encouraged to use for Assignment 5 in CS 492, Spring 2020. The purpose of this standardized formatting is two-fold. First, it ensures that the total page count is roughly comparable between students. Second, since this layout is relatively easy to read on a screen, it will help the TAs when marking your essay.

In particular, if you can, please roughly adhere to the following guidelines.

- Include a cover page with your name.
- Use US Letter sized paper ( $8.5 \times 11$  inches;  $215.9 \times 279.4$  mm).
- Use a 12pt font.
- Use 125% line-spacing.
- Use a one inch margin (25.4 mm).
- Put your student number, as well as the current page number onto each page

Everything else is up to you!

## Using this L<sup>A</sup>T<sub>E</sub>X document as a template

First of all, note that you are free to use any word processing system of your liking; just try to adhere to the above guidelines.

If you would like to, feel free to use this very L<sup>A</sup>T<sub>E</sub>X document as a template. You can find a ZIP file with everything to get you started here:

```
https://www.student.cs.uwaterloo.ca/~cs492/20Spublic\_html/  
Handouts/asst5.wishlist.sheet.zip
```

*Note:* You can directly upload this ZIP file to an online L<sup>A</sup>T<sub>E</sub>X environment such as Overleaf, so there is no need to install any special software on your computer.

Among other things, L<sup>A</sup>T<sub>E</sub>X (Lamport, 1994) greatly simplifies bibliography management. Just add sources to the `bibliography.bib` file included in the archive linked above. See below for an example of an auto-generated bibliography.
