r Alumnier and USY'er;

On April 9, 1966, the Heights Temple Alumni is sponsoring an OPERATION SHADCHAN. As suggested by the name, this dance will be a date affair; however, your date will be provide by an IBM 7040 system. A matchmaking program has been written and it will use the anwers to the questions of the survey in these pages. You are to anwer the the first time in terms of yourself in Section A of the answer sheet on the last page. Then the questions are to be answered in terms of your ideal date. There is a word or two of warning; be honest and do not try to out-psyche the computer, for the results can and will be disastrous. The computer will give you what you asked for, not what you meant to ask for. Thus, when you answer the questions, especially the second time be careful. (In the second answering if it makes no difference to you how your date answers the question put a zero in the answer sheet by that question, but only if it really makes no difference. The computer will use the zeros to make its job easier. When you've finished the questions send the sheet with the \$0.75 deposit and your signature agreeing to date whomever the computer matches you with. The reason for a deposit, which is non-refundable, and the agreement is quite obvious; we don't want anyone to "chicken out" and leave someone else dateless.

In order that we may complete the programming in time the absolute deadline for our receipt of the answer sheet is <u>March 13, 1966.</u>

GOOD LUCK ON YOUR DATE,

## Daniel Berry, programmer P. S, Contact me at YE 2-3771 if you have any questions.

In 1966, when I was 17 years old and a senior in HS, I organized a dance in which one's date for the dance was found by software I wrote. I adapted the second test of the 1965-1966 Operation Match to high school age (from college age) so "believe in sex on first date" became "believe in kissing on first date" :-). Also I wrote the software to implement dance mode instead of dating mode, so that EACH boy was matched with a girl and vice versa, a one-for-one match, with an equal number of boys and girls. (The excess boys who signed up last got their money back!)

I did not know that Operation Match had also done party mode, because all I saw was the second of the 1965-1966 tests. The 1967 test had not come out yet in 1966. So I thought I invented party mode! :-)

OPERATION SHADCHAN

"Shadchan" (with "ch" as in German "ach" or as in Spanish "Jose") means "matchmaker" in Hebrew and Yiddish.

The 58 multiple choice questions on this questionnaire are to be answered twice on the enclosed ænswer sheet. The first answering is to provide OPERATION SHADCHAN with information about you; in each select the term or scale point which best describes you or your personality, and write its number in the appropriate space in Section A of the answer of the answer sheet. If in some instances none of the terms seem to apply, select the one which most nearly describes you. Ask other people if necessary, for the success of OPERATION SHADCHAN as a whole, and especially in your individual case, depends on your honesty.

In the second answering, select the characteristics of the person you would most like to date. Enter the numbers of your answers in Section B of the answer sheet.

Some questions will be weighted more highly than others in the matching program, and you have some control over the weighting system used to select your dates. During the second answering only, if the way your match answers some particular question or questions makes no difference to you, enter zero (0) in the appropriate space on Section B of the answer sheet.

## SECTION ONE: MULTIPLE CHOICE

Instructions: Decide upon the word or phrase which best describes you (first answering) or your ideal date (second answering). Enter its number in the appropriate space on the answer sheet. Remember the options offered above. (The questions are numbered starting with number 11. to make the data-processing easier).

ll. I date on the average: 2 or more times a week	15. Gro 1 has bee	atest influence on my	life	
once a week	2 father		1	
once every 2 weeks	3 mother			
once a month or less	4 teacher	`S	2 3
